

Picks of the Month – December 2008

Video Picks:

Freedom Machines

This video tells about several adaptive devices that allow people to live a more normal life. It shows wheelchairs that can climb stairs, intelli-keys, Braille readers and gives hope to people with disabilities that technology can make a difference in their lives.

Communication Matters

This video shows how communication can be used and how people use different types of devices. It is a great training video for support staff. It also shows how to support someone that does not communicate verbally to talk to people on the phone.

Facilitated Communication Family and Friends

This video is about how Facilitated Communication is used with family and friends. FC is also shown to change people's lives.
